CYANOACRYLATE ADHESIVE
REVISED: DECEMBER/2010

ADVANCE PERFORMANCE SERIES
SI 5 CYANOACRYLATE ADHESIVE
SURFACE INSENSITIVE ADHESIVE

DESCRIPTION:
SI 5 is a surface insensitive cyanoacrylate adhesive that is used in applications that require faster cure speeds, on parts that are dry, and on parts that may be acidic. The SI Series bonds a wide range of similar and dissimilar surfaces. The SI Series provides exceptional performance in a wide range of applications.

FACTORS AFFECTING CURE SPEED:
GAP: Thin bond line results in faster cure speed. Larger gaps will lengthen cure speed.
HUMIDITY: Cure and fixture times can be influenced by the humidity conditions at the time of assembly. Higher the RH the faster the cure and fixture times will be. Fixture time data based on our testing is conducted at 50% relative humidity.

Directions for Use:
For optimum results parts should be clean and free from any contamination on the bonding surface. If parts do not mate flush together use a higher viscosity product to compensate for the gap. Any excess adhesive can be removed using Remove Debonder.

Storage:
Store product in unopened containers, out of direct sunlight, in a dry location. Material should be stored at or below 22°C. For extended shelf life unopened containers of the product may be refrigerated.
